

Environmental Policy Statement

Barnfield Construction Limited recognises its responsibility to manage the environmental impacts of its activities in all areas of business, acknowledging the finite nature of global resources and the effects of human activity on world climate and ecosystems. Barnfield Construction Limited operates an Integrated Environmental Management System accredited to ISO 14001: 2015.

Aims

Barnfield Construction Limited sets out to minimise its impact on the environment and strive for continual improvement in all identified aspects through improved efficiencies, reduced wastage and effective planning both within the organisation and in conjunction with relevant stakeholders.

By raising environmental awareness among employees and partners we will encourage them to consider their impacts on the environment.

Objectives

To comply with all regulations, statutory requirements and standards related to its operations and activities.

To prevent accidental pollution incidents

To monitor our environmental impacts and review each year to drive continuous improvement.

To reduce carbon emissions year-on-year in accordance with our Target Net Zero statement of intent.

To recycle materials as far as is practical and reduce non-recyclable inputs where viable alternatives exist, year on year.

To reduce operational energy consumption, emissions and waste pro-rata year-on-year.

To continually improve our waste footprint, driving internal improvements and working with supply chain partners to drive a reduction in overall waste and particularly in single-use plastics.

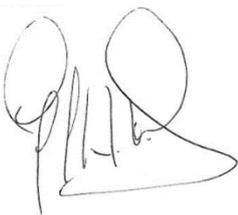

Responsibilities and Commitment

The Directors are committed to accountability for the effectiveness of the environmental management system, ensuring that the environmental policy and objectives are established and are compatible with the activities of the organisation.

Management at all levels are responsible for ensuring the systems and processes set out for ensuring effective environmental management are brought to the attention of all under their control, and for monitoring operational compliance.

Periodic review

This policy will be reviewed annually, or more frequently in the event of any changes to statutory requirements or any evidence that the policy is not fully effective.
