

BARNFIELD
CONSTRUCTION

CONTRACTORS. DEVELOPERS. INVESTORS.

TARGET NET ZERO

Our vision for a sustainable future

Statement of Intent

The Barnfield group of companies is committed to protecting the environment in all our operations and are proud to promote three principles which are interwoven with our policies and procedures and decisions:

- Consume Less
- Buy Smarter
- Re-use / Up-Cycle / Recycle

We recognise that climate change poses a huge challenge requiring bold and decisive action. Reducing greenhouse gas emissions will be critical to mitigating climate change and will require dedicated long term effort, commitment, and collaboration.

We have always maintained a lean approach to operations, which carries inherent carbon efficiencies, but we recognise that now is a time for more ambitious open thinking to effectively tackle the challenge of climate change. Our Net Zero Carbon strategy will guide us to NZC for our direct greenhouse gas emissions by 2040.

Our commitment to decarbonise goes beyond scope 1 & 2 emissions, although this will be our initial focus. Our NZC progress will guide us to enhance our understanding of our Scope 3 (indirect emissions) helping us to share our findings and work with our commercial partners, to bring them on our journey and inspire them.

Tackling the challenges of climate change requires partnership and teamwork to develop and deliver innovative solutions that reduce emissions and present new opportunities. We believe that good environmental governance offers win-win solutions that improve commercial performance too.

There is no time for any responsible enterprise to indulge in short-term commercial cynicism, too much damage has already been done. Failure is not an option, it would render commerce and business irrelevant. Long term prosperity depends on a thriving planet with thriving societies.

We look forward to sharing our progress, challenges and solutions on a regular basis along with open & honest annual reporting, collaborating with our people and partners to safeguard the future for us all.

Tim Webber MBE
Chairman & Managing Director
